

Texas Instream Flow Program: Overview

Kevin Mayes
Wendy Gordon
Mark Wentzel

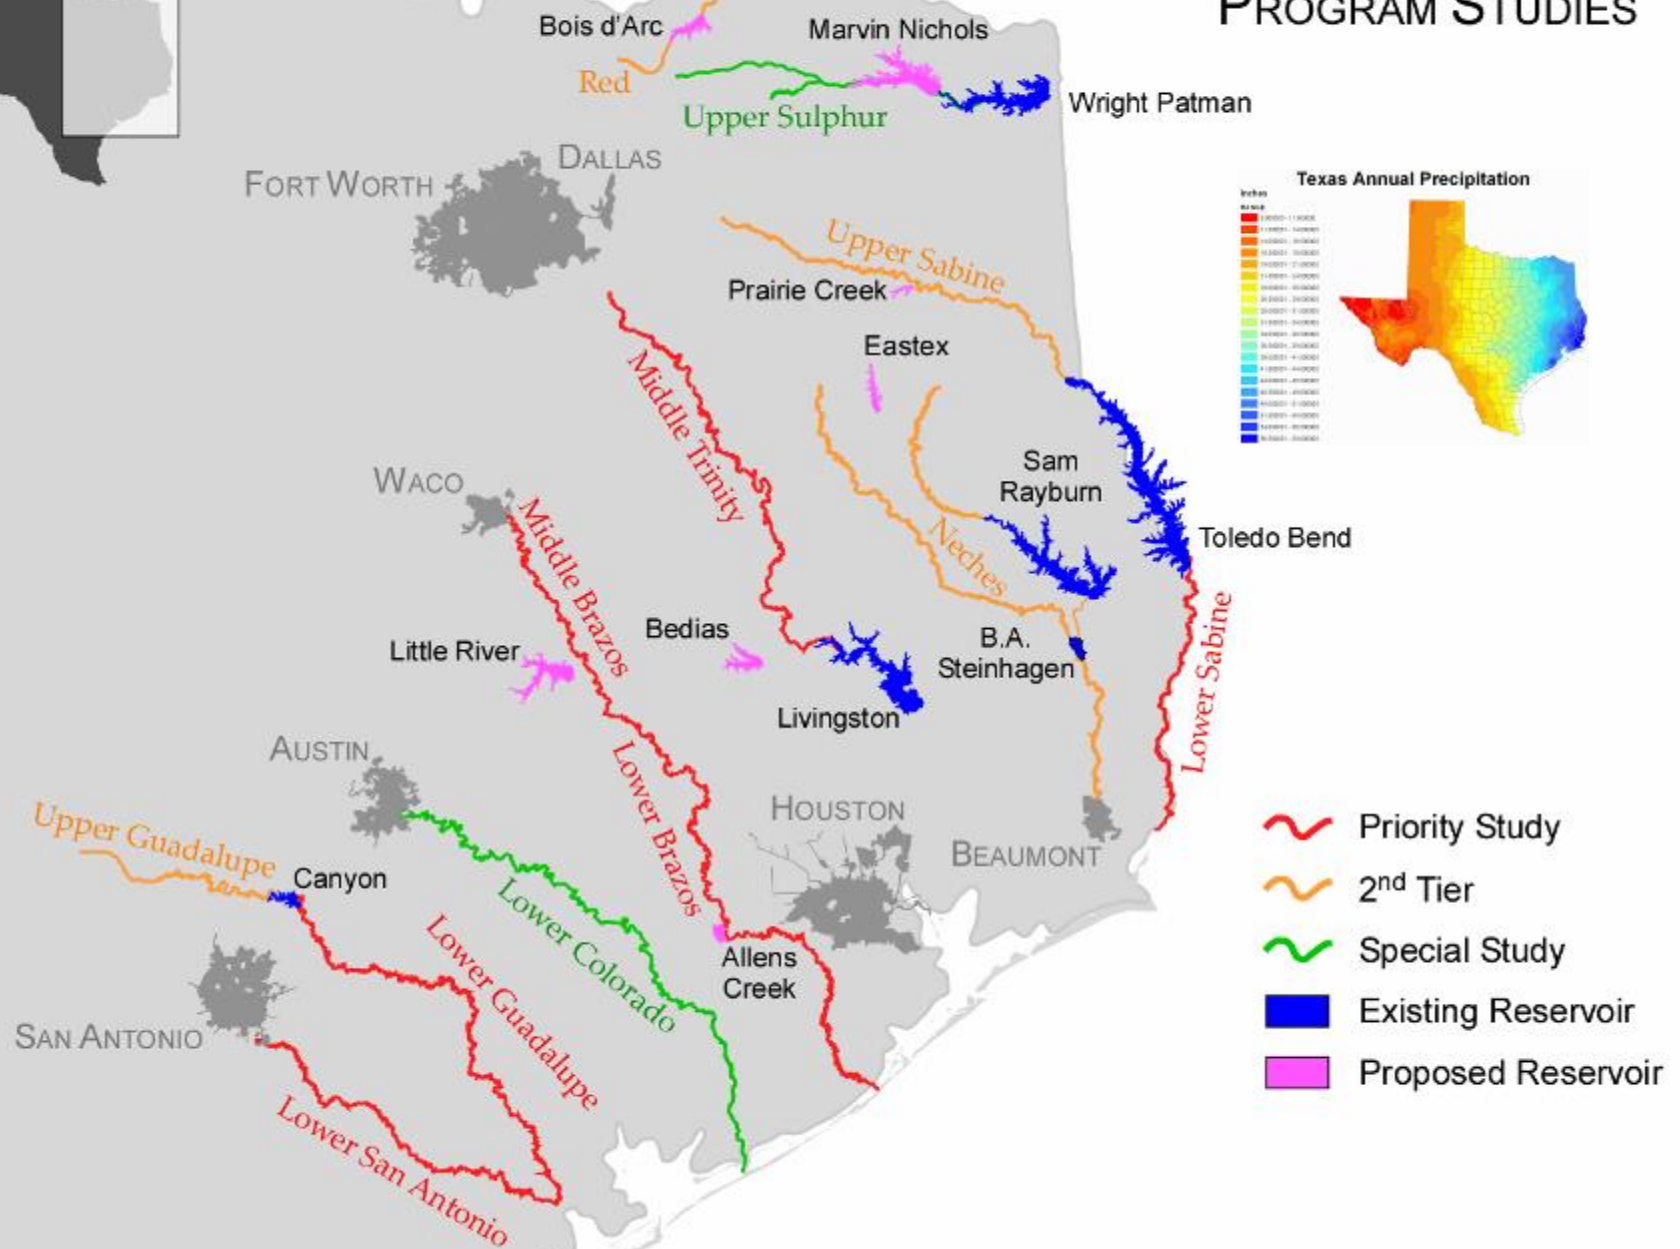

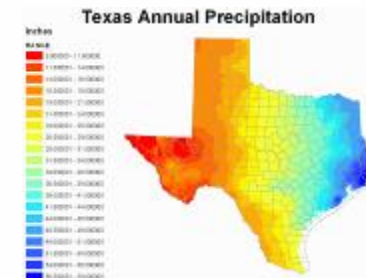

September 3, 2008

Senate Bill 2

In 2001, the Texas Legislature directed TCEQ, TPWD & TWDB to:

- Establish data collection and evaluation program
- Determine flow conditions necessary to support a **sound ecological environment** in Texas rivers and streams
- Complete priority studies by December 31, 2010 now 2016

Source: TPWD, TWDB & TCEQ. 2002. Texas Instream Flow Studies: Programmatic Work Plan

- **State methodology peer reviewed by NRC panel**
- **Members included Texas scientists**
- **Favorable report published in 2005**

Instream Flow Components

(recommended by National Research Council 2005)

press!**

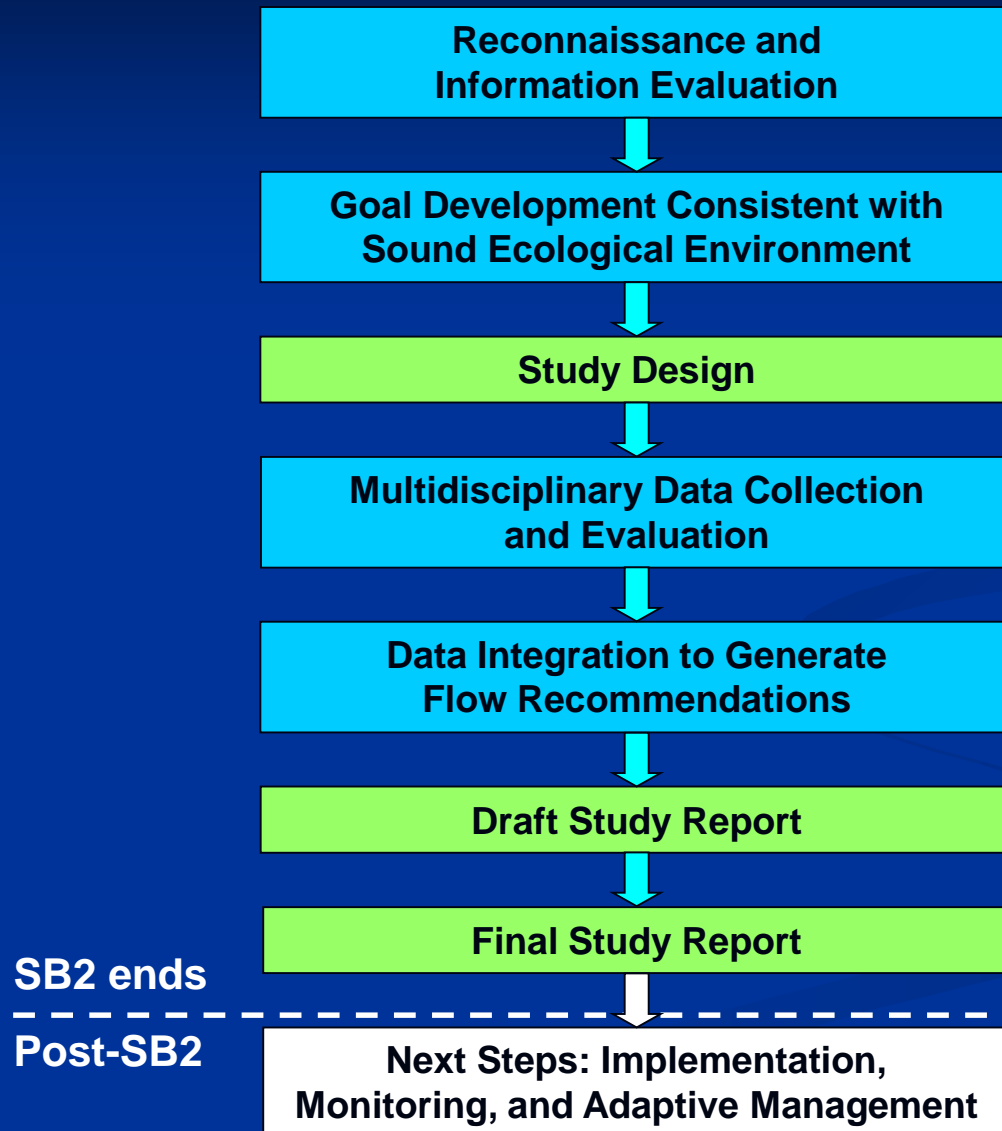

Texas Instream Flow Studies: Technical Overview

Report 369
May 2008

Texas Commission on Environmental Quality
Texas Parks and Wildlife Department
Texas Water Development Board

Steps in TIFP Sub-Basin Studies

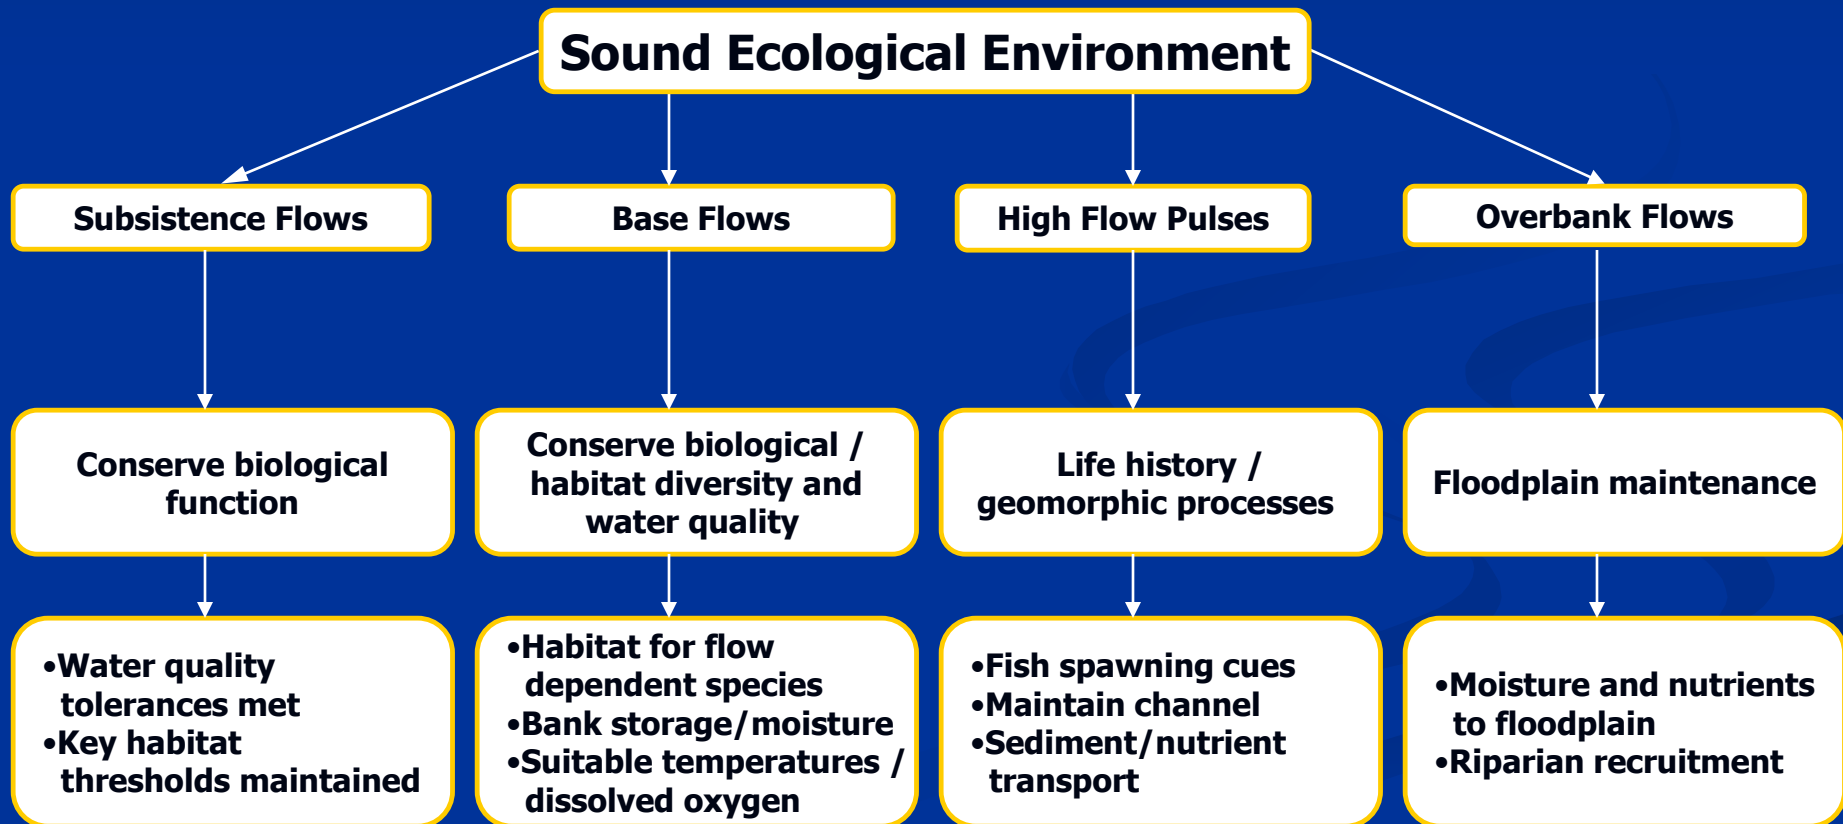

Study Design

- **Develop conceptual model of system**
- **Determine geographic scope of study**
- **Prioritize data needs consistent with agreed upon goals and objectives**
- **Develop basin-specific interdisciplinary study plan**

Simple Conceptual Model

Legislative Directive

**...determine flow conditions
in the state's rivers and streams
necessary to support a
sound ecological environment**

Statewide Goal: Sound Ecological Environment

A resilient, functioning ecosystem characterized by intact, natural processes and a balanced, integrated, and adaptive community of organisms comparable to that of the natural habitat of a region.

Statewide Objectives:

To meet the criterion of “sound”

1. Evaluate processes

- **Hydrology and hydraulics**
- **Geomorphology (Physical processes)**
- **Water quality**
- **Connectivity**

2. Evaluate biological communities:

- **Integrity**
- **Biodiversity**
- **Relationships**

Multidisciplinary Data Collection and Evaluation

Hydrology & Hydraulics

- Calculate flow statistics
- Describe wet, normal, & dry conditions
- Model hydraulic characteristics over a range of flows

Hydraulic Modeling

Depth at Rainwater Ranch at Q=100cfs

Depth at Rainwater Ranch at Q=1000cfs

Velocity at Rainwater Ranch at Q=100cfs

Velocity at Rainwater Ranch at Q=1000cfs

Biology

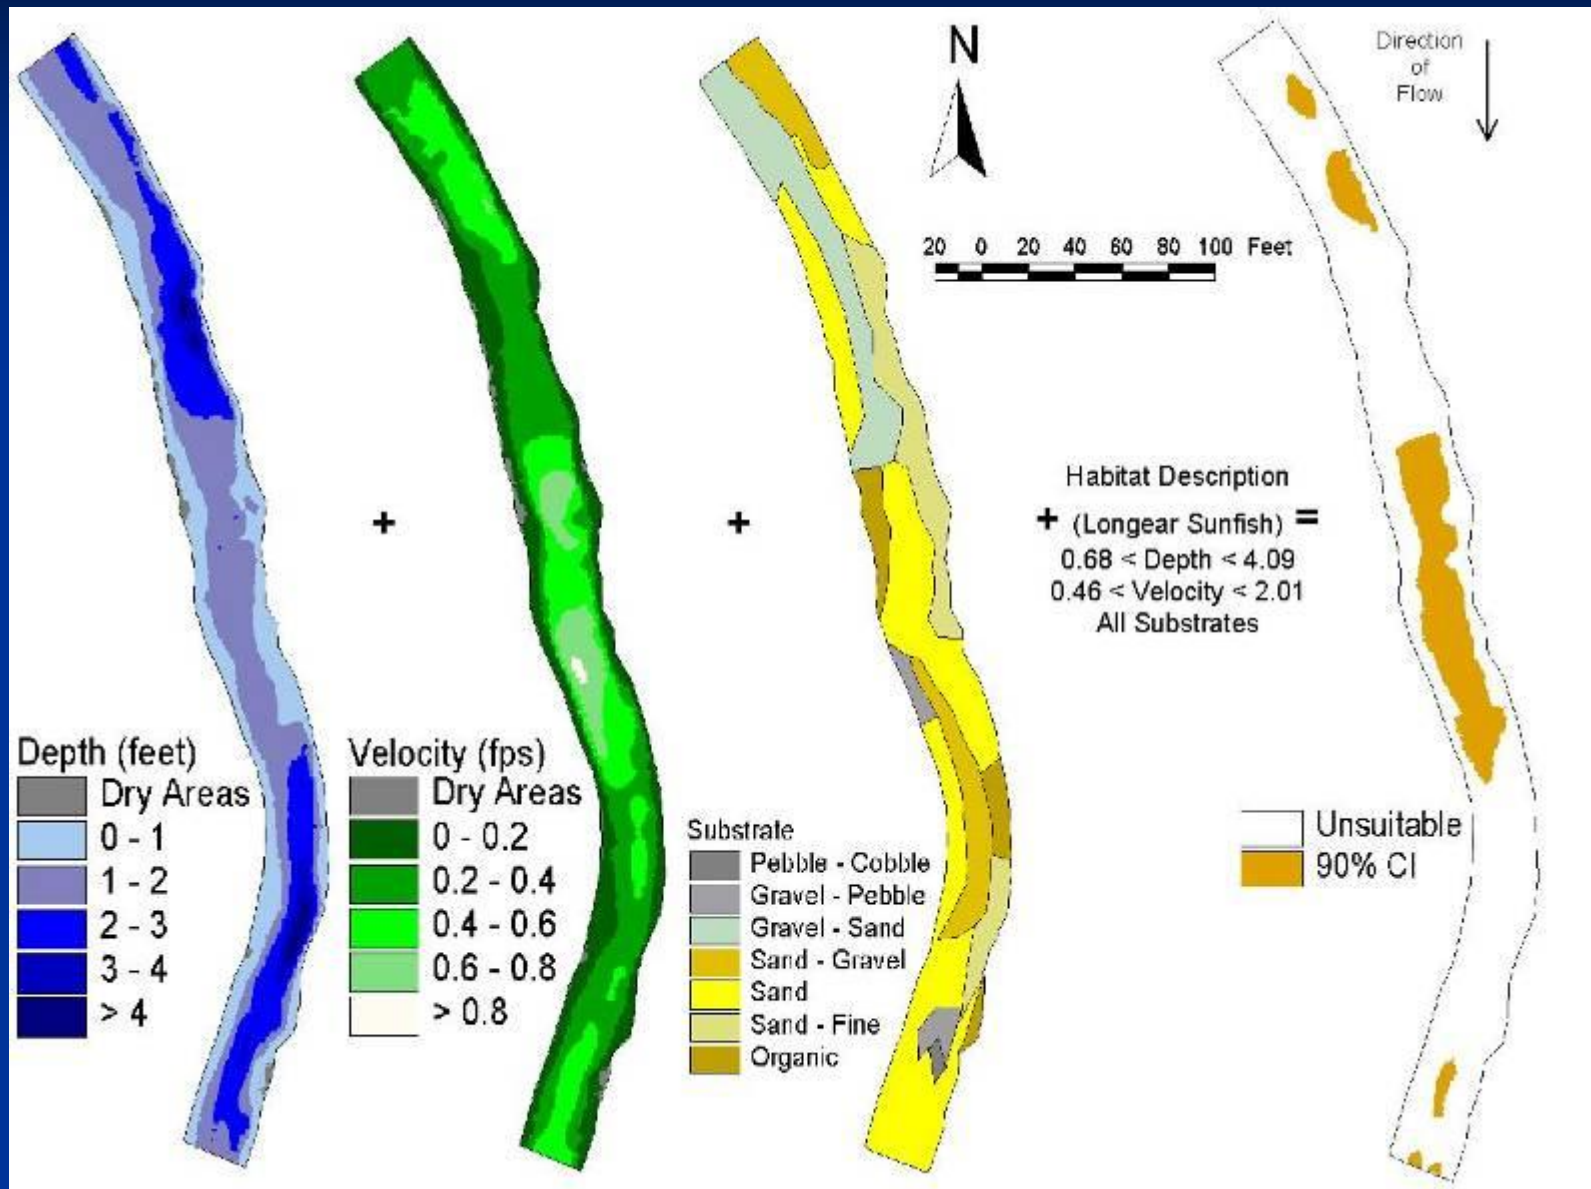

- **Examine integrity of biological community**
- **Examine biodiversity within ecosystem**
- **Assess habitat-flow relationships**

Suitability Criteria for Habitat Modeling

Velocity Bin	TWR freq	Univ freq	hsi	normal factor	std hsi	binary hsi
0.0-0.1	14	611	0.023	4.737	0.109	0

2-D Microhabitat Modeling

Use of Habitat Guilds for Mesohabitat Modeling

Hydraulically-defined Mesohabitats

2-D Mesohabitat Modeling

**Flow =
100 cfs**

Mesohabitat

400 0 400 800 1200 1600 Feet

2-D Mesohabitat Modeling

**Flow =
1,000 cfs**

Mesohabitat

Mesohabitat Area vs. Flow (cfs)

Physical Processes (Geomorphology)

- **Examine bed, banks, and floodplains**
- **Assess channel adjusting and overbank flow behavior**
- **Develop sediment budgets**
- **Identify habitat features**

Water Quality

- Identify constituents of concern
- Assess low flow-water quality relationship
- Conduct water quality modeling studies

Connectivity

- **Hydrologic connectivity**
 - Upstream to down
 - Channel to floodplain
- **Groundwater/surface water interactions**

Data Integration to Generate Flow Recommendations

Synopsis of Study Process

What is an Instream Flow?

An instream flow is the amount of water running in a river, usually measured by the volume moving down the channel in a specified amount of time. A variety of instream flows are required to maintain a healthy river.

Biology

Biodiversity

Habitat Diversity

Volunteer Workgroups to Collaborate with Agencies On:

Goal of a healthy environment for the river

- **Reflecting public values**
- **Consistent with definition of Sound Ecological Environment**

Objectives & indicators to accomplish the goal

Study design details

Who's a Member?

Volunteers representing:

- Louisiana
- Private landowners
- Environmental groups
- River authorities
- State and federal agencies
- Groundwater districts
- Municipalities
- Industry
- Drainage districts
- Etc.

Study Design Workgroup

What's the Plan?

Workgroup meetings

Meeting 1: Goals

Meeting 2: Objectives

Meeting 3: Indicators

Meeting 4: Review of study design

Workgroup Schedule

Meeting 1: August & September

Meeting 2: September & October

Meeting 3: TBD

Meeting 4: TBD

Meetings held in basin

Workgroup Product

Instream Flow Study Design for the Brazos River

December 2008

Study Design Table of Contents

1. Study cooperators & stakeholders (who)
2. Study boundaries (where)
3. State of the river (why)
4. Conceptual model
5. Study goal
6. Study objectives
7. Indicators
8. Studies that need to be done (what)
9. Studies that will be done (what)
10. Study reaches (where)
11. Sampling schedule (when)

First Workgroup Meeting: Goal Development

**What does a healthy lower
Sabine River in the future look
like to us?**

Statewide Goal: Sound Ecological Environment

A resilient, functioning ecosystem characterized by intact, natural processes and a balanced, integrated, and adaptive community of organisms comparable to that of the natural habitat of a region.

AGENDA
9:00 Welcome/Introductions
9:30 TIFP Overview
Study design overview
Workshop organization
12:15 Lunch
1:00 Intro. to goal development
Develop basin goal
Q + A session
Meeting wrap-up +
prepare for next meeting
4:00 Adjourn

What does a
healthy Sabine River
in the future look
like to us?

Group 1

A healthy Sabine river
would have characteristics
of natural habitats of region.

→ Sustainable functions
Sustainable processes
native ecosystems
current state of river is good

- WQ
- least impacted fishery

healthy habitat for fish + aquatic
plants

components to support sustainable resources

What does a
healthy Sabine River
in the future look
like to us?

Sabine Goal Statement

August 19, 2008

"Our goal is a healthy, functioning Lower Sabine River Basin that has

- high quality water,**
- sufficient flow, and**
- a sustainable ecosystem**

to assure a dynamic balance between human needs and the environment."

1. Study objectives and deliverables
2. Study timeline
3. Study of the river
4. Comparison
5. Study plan
6. Study timeline
7. Indicators
8. Study for next 10 to 15 years
9. Study for next 10 to 15 years
10. Study timeline
11. Study timeline

Brazos Goal Statement

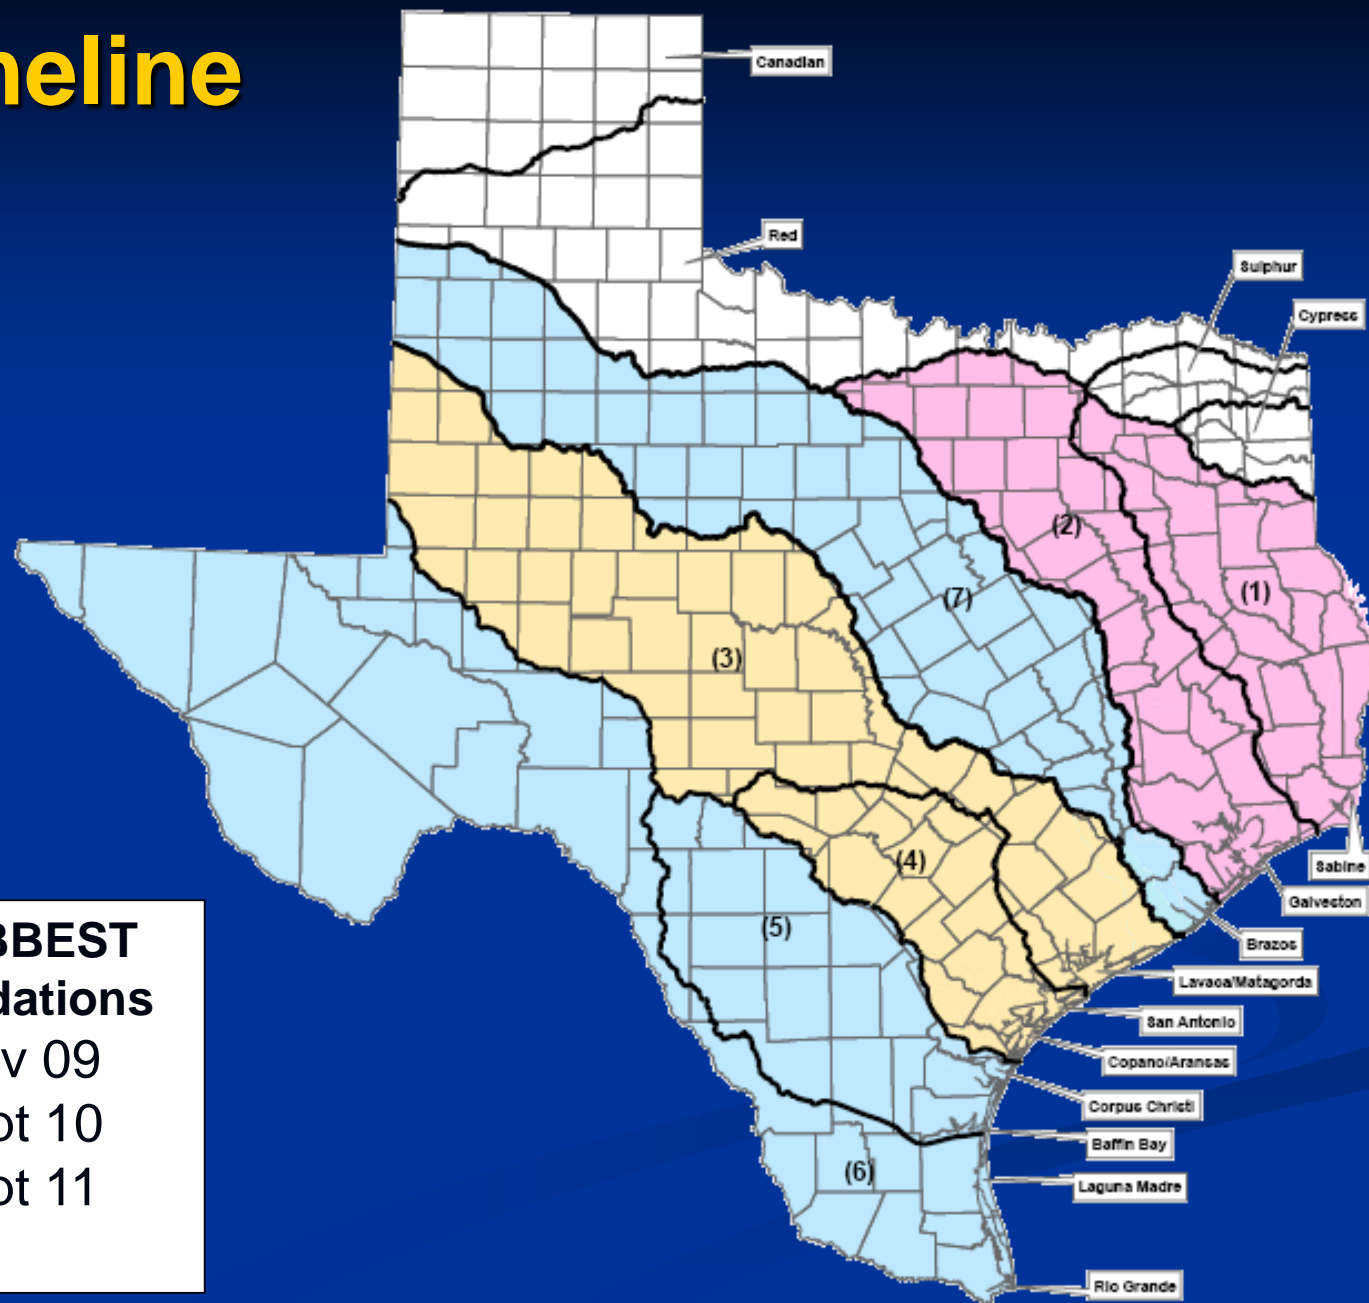

August 21, 2008

"A Middle and Lower Brazos River that provides for sustainable environmental, economic, and social uses."

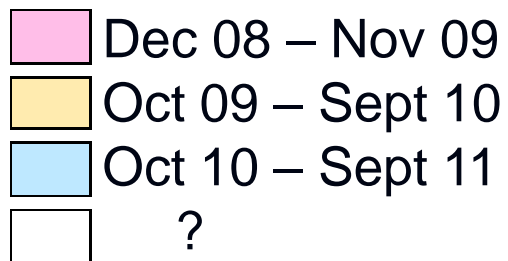

Ongoing Activities

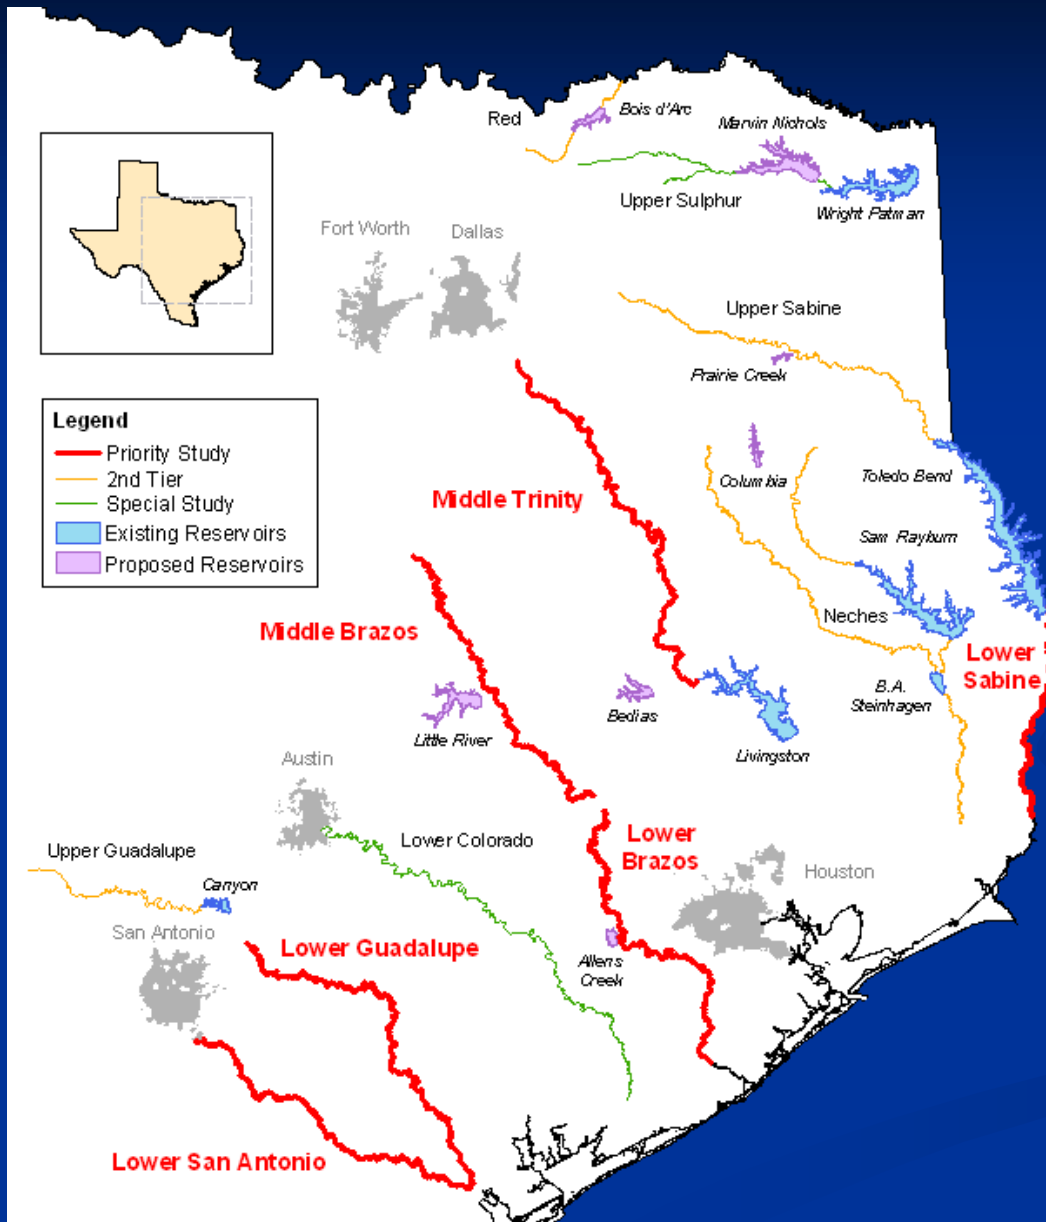

SB3 Timeline

Development of BBEST Flow Recommendations

SB2 Timeline

Current Priority Studies

- Lower Sabine
- Middle & Lower Brazos
- Lower San Antonio

Study Designs - 2009
Completed Studies - 2012

Remaining Priority Studies

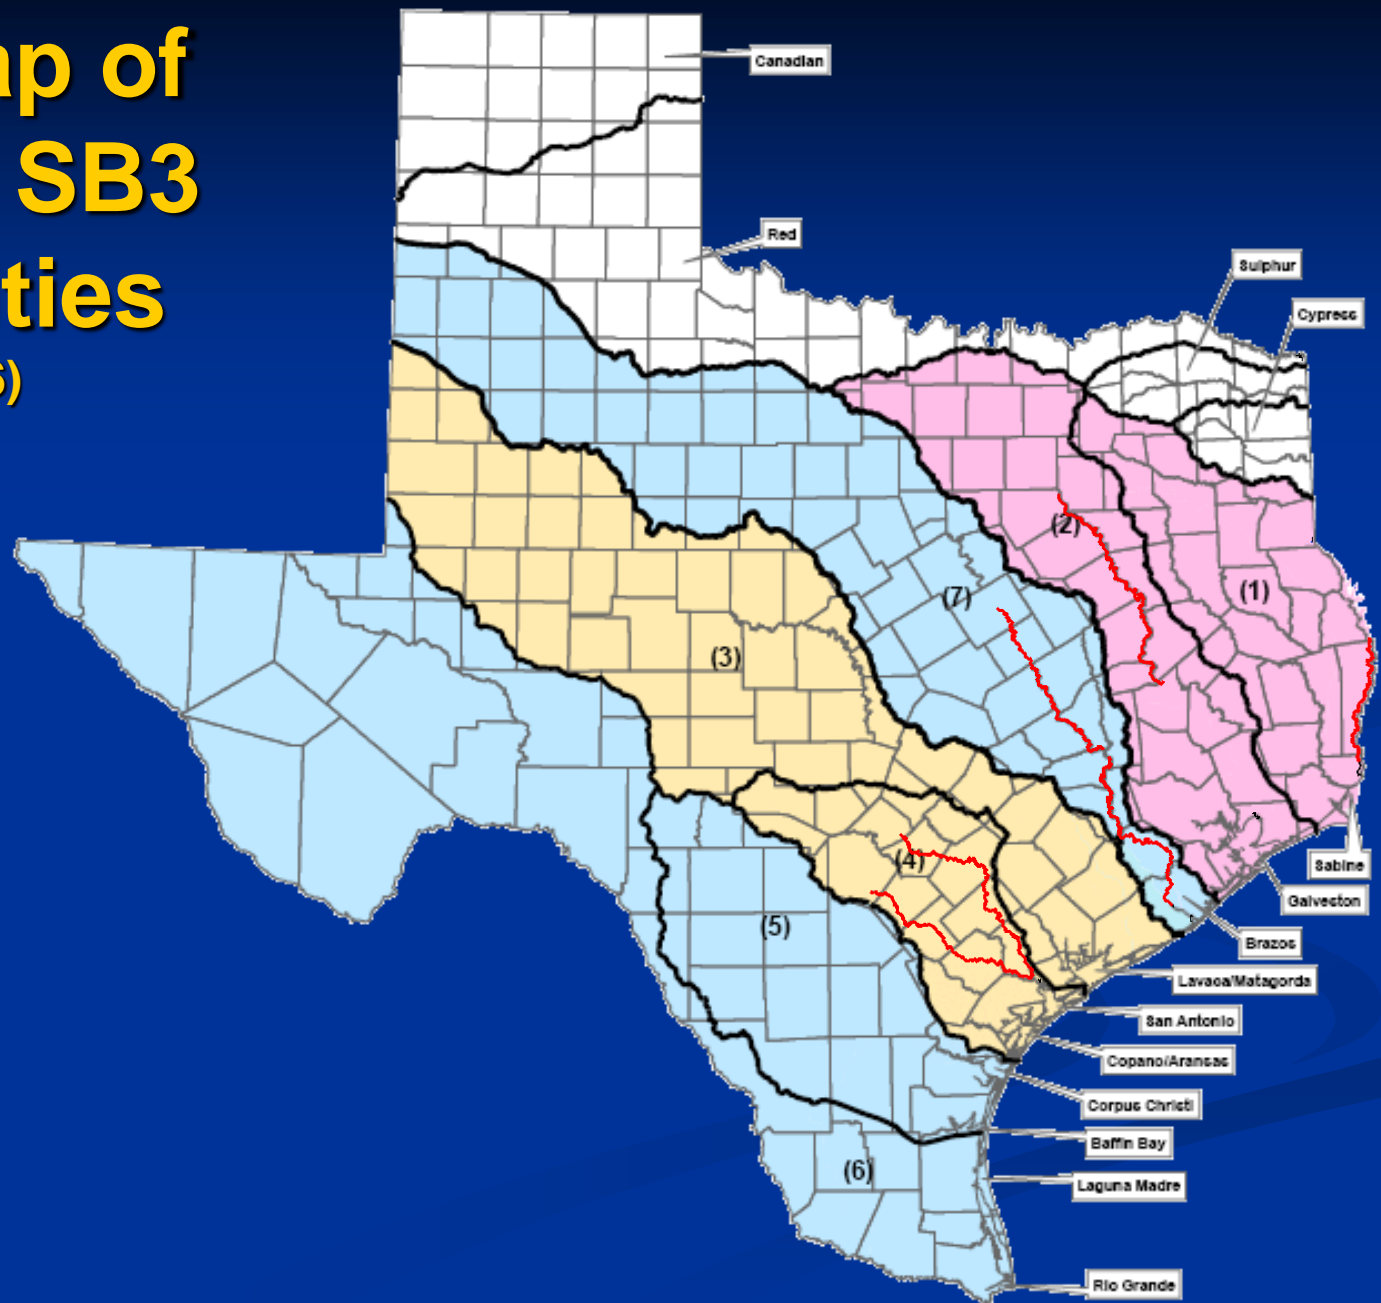

- Middle Trinity
 - Lower Guadalupe
- Completed Studies - 2016

Second Tier Studies

- Upper Guadalupe
- Neches
- Upper Sabine
- Bois d'Arc

Completed Studies - ?

Overlap of SB2 & SB3 Activities (2016)

Ongoing Activities

Related to SB3

1. Compilation of best available science
2. Quick methods/classification
3. Baseline data and evaluation

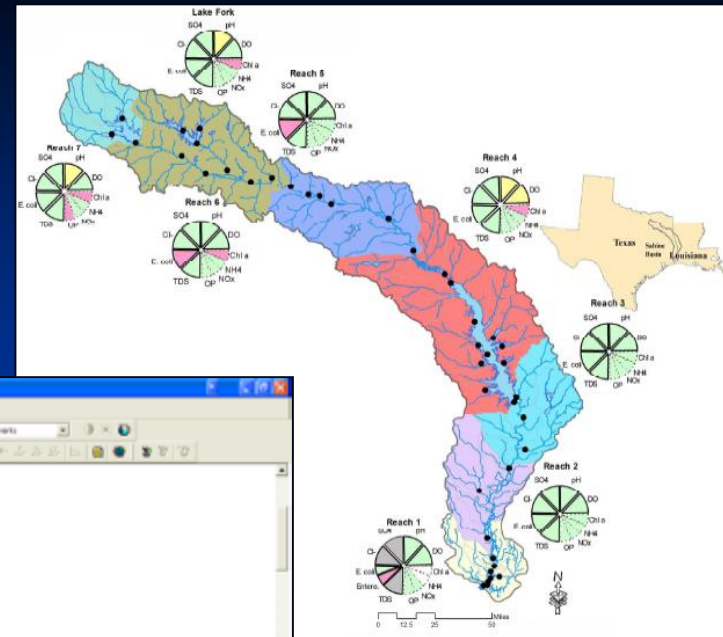

Related to TIFP

1. Studies to improve methodology
2. Baseline data collection and evaluation
3. Instream flow studies

Activities of Potential Value to SB3 Process

- 1. Compilation of best available science**
 - Bibliography of publications/data**
 - Hydrologic Information System**
 - Biological Information System**
- 2. Quick methods/classification**
 - Assessment of hydrologic alteration**
 - TX-HAT**
 - HUC classification**
 - Geomorphic classification**
- 3. Raw data and preliminary studies**
 - Mussel studies**
 - Recent fish collections**
 - Analysis of historic fish data**

Bibliography of Publications/Data

The map displays the Colorado Plateau region, with yellow pushpins indicating specific locations. The pushpins are labeled with numerical codes, many of which are 10-digit numbers. The map includes labels for the states of Colorado, Kansas, and New Mexico. A sidebar on the right shows a list of codes and a search bar.

States shown: Colorado, Kansas, New Mexico.

Pushpin codes (from top to bottom, left to right):

- 10005, 10009, 10067, 10077, 10178, 10187, 10191, 10184, 10183, 10182, 10181, 10180, 10179, 10178, 10177, 10176, 10175, 10174, 10173, 10172, 10171, 10170, 10169, 10168, 10167, 10166, 10165, 10164, 10163, 10162, 10161, 10160, 10159, 10158, 10157, 10156, 10155, 10154, 10153, 10152, 10151, 10150, 10149, 10148, 10147, 10146, 10145, 10144, 10143, 10142, 10141, 10140, 10139, 10138, 10137, 10136, 10135, 10134, 10133, 10132, 10131, 10130, 10129, 10128, 10127, 10126, 10125, 10124, 10123, 10122, 10121, 10120, 10119, 10118, 10117, 10116, 10115, 10114, 10113, 10112, 10111, 10110, 10109, 10108, 10107, 10106, 10105, 10104, 10103, 10102, 10101, 10100, 10099, 10098, 10097, 10096, 10095, 10094, 10093, 10092, 10091, 10090, 10089, 10088, 10087, 10086, 10085, 10084, 10083, 10082, 10081, 10080, 10079, 10078, 10077, 10076, 10075, 10074, 10073, 10072, 10071, 10070, 10069, 10068, 10067, 10066, 10065, 10064, 10063, 10062, 10061, 10060, 10059, 10058, 10057, 10056, 10055, 10054, 10053, 10052, 10051, 10050, 10049, 10048, 10047, 10046, 10045, 10044, 10043, 10042, 10041, 10040, 10039, 10038, 10037, 10036, 10035, 10034, 10033, 10032, 10031, 10030, 10029, 10028, 10027, 10026, 10025, 10024, 10023, 10022, 10021, 10020, 10019, 10018, 10017, 10016, 10015, 10014, 10013, 10012, 10011, 10010, 10009, 10008, 10007, 10006, 10005, 10004, 10003, 10002, 10001, 10000, 99999, 99998, 99997, 99996, 99995, 99994, 99993, 99992, 99991, 99990, 99989, 99988, 99987, 99986, 99985, 99984, 99983, 99982, 99981, 99980, 99979, 99978, 99977, 99976, 99975, 99974, 99973, 99972, 99971, 99970, 99969, 99968, 99967, 99966, 99965, 99964, 99963, 99962, 99961, 99960, 99959, 99958, 99957, 99956, 99955, 99954, 99953, 99952, 99951, 99950, 99949, 99948, 99947, 99946, 99945, 99944, 99943, 99942, 99941, 99940, 99939, 99938, 99937, 99936, 99935, 99934, 99933, 99932, 99931, 99930, 99929, 99928, 99927, 99926, 99925, 99924, 99923, 99922, 99921, 99920, 99919, 99918, 99917, 99916, 99915, 99914, 99913, 99912, 99911, 99910, 99909, 99908, 99907, 99906, 99905, 99904, 99903, 99902, 99901, 99900, 99899, 99898, 99897, 99896, 99895, 99894, 99893, 99892, 99891, 99890, 99889, 99888, 99887, 99886, 99885, 99884, 99883, 99882, 99881, 99880, 99879, 99878, 99877, 99876, 99875, 99874, 99873, 99872, 99871, 99870, 99869, 99868, 99867, 99866, 99865, 99864, 99863, 99862, 99861, 99860, 99859, 99858, 99857, 99856, 99855, 99854, 99853, 99852, 99851, 99850, 99849, 99848, 99847, 99846, 99845, 99844, 99843, 99842, 99841, 99840, 99839, 99838, 99837, 99836, 99835, 99834, 99833, 99832, 99831, 99830, 99829, 99828, 99827, 99826, 99825, 99824, 99823, 99822, 99821, 99820, 99819, 99818, 99817, 99816, 99815, 99814, 99813, 99812, 99811, 99810, 99809, 99808, 99807, 99806, 99805, 99804, 99803, 99802, 99801, 99800, 99799, 99798, 99797, 99796, 99795, 99794, 99793, 99792, 99791, 99790, 99789, 99788, 99787, 99786, 99785, 99784, 99783, 99782, 99781, 99780, 99779, 99778, 99777, 99776, 99775, 99774, 99773, 99772, 99771, 99770, 99769, 99768, 99767, 99766, 99765, 99764, 99763, 99762, 99761, 99760, 99759, 99758, 99757, 99756, 99755, 99754, 99753, 99752, 99751, 99750, 99749, 99748, 99747, 99746, 99745, 99744, 99743, 99742, 99741, 99740, 99739, 99738, 99737, 99736, 99735, 99734, 99733, 99732, 99731, 99730, 99729, 99728, 99727, 99726, 99725, 99724, 99723, 99722, 99721, 99720, 99719, 99718, 99717, 99716, 99715, 99714, 99713, 99712, 99711, 99710, 99709, 99708, 99707, 99706, 99705, 99704, 99703, 99702, 99701, 99700, 99699, 99698, 99697, 99696, 99695, 99694, 99693, 99692, 99691, 99690, 99689, 99688, 99687, 99686, 99685, 99684, 99683, 99682, 99681, 99680, 99679, 99678, 99677, 99676, 99675, 99674, 99673, 99672, 99671, 99670, 99669, 99668, 99667, 99666, 99665, 99664, 99663, 99662, 99661, 99660, 99659, 99658, 99657, 99656, 99655, 99654, 99653, 99652, 99651, 99650, 99649, 99648, 99647, 99646, 99645, 99644, 99643, 99642, 99641, 99640, 99639, 99638, 99637, 99636, 99635, 99634, 99633, 99632, 99631, 99630, 996
